

# 0.004" STENCILQUIK™ BGA REWORK STENCILS

### **DESCRIPTION**

StencilQuik stencils are made from two layers of cl ear amber polyimide Im with an adhesive backing. It is coated with an aggressive permanent acrylic adhesive and backed with a 50# Kraft release liner. The StencilQuik stencils are pre-scored to allow for easy removal of the release liner.

## **USES**

Intended for use as a "remain-in-place" stencil for the application of solder paste or ux on printed circuit boards. The stencil material is designed to withstand high temperatures and harsh chemicals. Withstands through-hole and surface mount circuit board processes. This high-performance material is designed for applications requiring excellent solvent and heat resistance. StencilQuik stencils are designed with a permanent adhesive and they are not designed to be removed after being applied.

#### **FEATURES**

Excellent chemical, and heat resistance. The StencilQuik stencil is dimensionally stable (no shrinkage) with a high-performance adhesive. StencilQuik stencils have insulative properties in the material and adhesive. The minimum break through voltage (the voltage that will not pass through the polyimide) is 5000 volts. The voltage that will pass through the polyimide material is approximately 7000 volts.

PHYSICAL PROPERTIES				
	Material	Convention Units	S.I. Units	
THICKNESS	Polyimide	2.0 mils	102 microns	
	Adhesive	2.0 mils	102 microns	
	Liner (50#)	3.0 mils	75 microns	
	Total	7.0 mils	279 microns	
	(Results in a solder pri nt thickness of 0.008")			
ADHESIVE PERFORM ANCE	Stainless Steel	72.00 oz/in	790.00 N/m	
	Fiberglass	28.98 oz/in	317.32 N/m	
	Phenolic	29.97 oz/in	328.17 N/m	
	Nylon	40.55 oz/in	444.01 N/m	
	(Adhesive performance after a 72 hour dwell)			

SERVICE TEMPERATURES	1-40 minutes	572°F	300°C
	2-4 minutes	617°F	325°C
	1-9 seconds	842°F	450°C
	1-3 seconds	1000°F	538°C
APPLICATION TEMPERATURE	Minimum	50°F	10°F
CHEMICAL RESISTANCE	Test should be conducted Testing should consist of speci ed chemical reagent Cotton swab rub prior to r  Household Cleaners Mild Acid Oil Water 1 Part IPA, 1 Part Mineral S Terpene Defluxer Toluene	ve cycles of 10 min followed by 30 min nal immersion.  No effect No effect No effect No effect	nute immersions in the
	Saponifier	по епест	
STORAGE STABILITY	Product should be stored at 70 degrees F (21 degrees C) and 40 – 50% relative humidity to ensure optimal performance.		
SHELF LIFE	2 Years at the proper storage conditions.
